

ReplyEmail Errors:

✗ Howie hasn't seen the email you're replying to

- The Howie system isn't recognizing the email address that it is replying to.
- How to handle: Drop in Bugz
- This would have been a hallucination, so try replying again. Edit the replyto and use the drop down to select a real message ID

EX of what this error looks like: <https://howie.ai/admin/training/cmbzpwv1d008z4jcky5vt8uxb>

The screenshot displays the 'replyEmail' interface. On the left, under the heading 'replyEmail', there are fields for 'Reply-To' (containing '<cmbzpwu5t008nipyjcxquyrva>'), 'To' (containing 'semih@kuzudb.com, ardan@kuzudb.com'), and 'CCs' (containing 'diego.oppenheimer@gmail.com'). Below these fields is a 'View Calendar' button. On the right, a 'Response' section shows a red 'ERROR' status and a message box stating 'Howie hasn't seen the email you're replying to'. The interface also includes a calendar view at the bottom showing 'Tue, Jun 24: 9:00am PDT'.

✗ Error Rendering email template: “time” not defined in [object Object] - 5:3

This means you put a space between timeslots in the `{{timeslots}}` remove the space (`{{time slots}}`) and you should be good!
